Broadening Experiences in Scientific Training

Tuesday, November 4th
4:00 PM
148 Stocking Hall

Open Discussion Featuring

• Are you looking to learn how to transition to a career in industry at a Fortune 500 Company?
• Are you looking to learn how you can translate your academic experiences to an industrial career?
• Do you wonder what skills and experiences you should learn now to be ready for a career in industry?
• Do you understand what different career options and career paths exist in industry?

Dr. Goklen has 28 years of industry experience and is currently the Director of Engineering, Downstream Process Development, in the Biopharm business unit of GlaxoSmithKline (GSK). He joined GSK after 24 years as the Senior Scientific Director of BioPurification at Merck Research Laboratories. While his career has focused primarily on R&D process development activities, he has also been exposed to drug discovery and manufacturing organizations as well.
